## Claims:

- 1. A viral vector expressing a nucleic acid encoding 5T4 antigen.
- 2. A vector according to claim 1 which is a poxvirus vector.
- 3. A vector according to claim 2 which is MVA.
- 5 4. An expression vector which encodes and expresses 5T4 antigen.
  - 5. The vector according to claim 4 which is an entomopox virus vector.
  - 6. The vector of claim 1 wherein said 5T4 antigen is non-human.
  - 7. The vector of claim 6 wherein said non-human 5T4 antigen is a murine antigen.
- The vector of claim 6 wherein said non-human 5T4 antigen is a canine antigen.
  - 9. The vector of claim 1 wherein said 5T4 antigen is a modified 5T4 antigen.
- 10. The vector of claim 9 wherein said modified 5T4 antigen induces a CTL response an antitumor immunotherapeutic response or an antibody response to a tumor in a subject.
  - 11. The vector of claim 9 wherein said modified 5T4 antigen comprises an HLA CTL peptide epitope of 5T4.
  - 12. The vector of claim 9 wherein said modified 5T4 antigen is a human modified 5T4 antigen.

- 13. The vector of claim 11 wherein said modified 5T4 antigen is a human modified 5T4 antigen.
- 14. The vector of claim 11 wherein said modified 5T4 antigen comprises a peptide sequence selected from SEQ ID NOs: 5-17.
- 5 15. The vector of claim 9 wherein said modified 5T4 antigen comprises a peptide sequence selected from SEQ ID NOs: 18-27.
  - 16. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 1 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
- 17. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 3 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
  - 18. The pair of vectors according to claim 16, wherein said first viral vector is the priming vector and is an MVA vector.
- 15 19. The pair of vectors according to claim 17, wherein said first viral vector is the priming vector.
  - 20. The pair of vectors according to claim 16, wherein said second viral vector is the boosting vector and is an entomopox virus vector.
- 21. The pair of vectors according to claim 17, wherein said second viral vector is the boosting vector and is an entomopox virus vector.

- 22. A method of priming and boosting an immune response to 5T4 antigen in a subject, said method comprising administering a pair of vectors according to claim 16 to said subject.
- 23. A method of priming and boosting an immune response to 5T4 antigen in a subject, said method comprising administering a pair of vectors according to claim 17 to said subject.
  - 24. A method of priming and boosting an immune response to 5T4 antigen in a subject, said method comprising administering a pair of vectors according to claim 20 to said subject.
- 25. A method of priming and boosting an immune response to 5T4 antigen in a subject, said method comprising administering a pair of vectors according to claim 21 to said subject.
  - 26. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 6 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.

15

- 27. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 9 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
- 28. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 11 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.

- 29. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 12 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
- 30. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 16 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
  - 31. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 16 and a second poxvirus vector expressing a nucleic acid encoding a 5T4 antigen.
- 32. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 1 and a second poxvirus vector expressing a nucleic acid encoding the same 5T4 antigen as the first vector.
- 33. A pair of vectors for priming and boosting an immune response to 5T4 antigen in a subject, said pair of viral vectors comprising a first viral vector according to claim 3 and a second poxvirus vector expressing a nucleic acid encoding the same 5T4 antigen as the first vector.
